GOOD FAITH RECEIVING

SUPPLY CHAIN INTEGRITY

ASSET FOCUSED • SOLUTION BASED • RELATIONSHIP LED

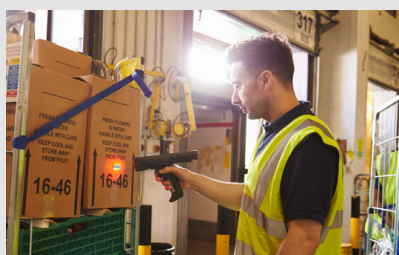

TOTAL CONFIDENCE WITH RAS 'GOOD FAITH RECEIVING'

Employing intelligent processes to take the unknown out of the supply chain...

We provide an end-to-end **Good Faith Receiving** solution to the UK and Europe's FMCG, DIY and Wholesale markets.

By combining deployment, operational integration, supplier on boarding, strategic audits, supplier and retail representation AND data results analysis; we help retailers and suppliers focus on selling products and driving efficiency into their supply chain.

Our service is '**GSCoP**' friendly, '**Drop & Drive Workgroup**' friendly, and already on-boarded by over 700 grocery suppliers to create a balanced cost neutral audit function, meaning efficiencies gained and savings made, outweigh the cost of service for both supplier and retailer.

THE GFR PRINCIPLE

01 To independently audit and capture supplier performance.

02 To provide GSCoP transparency and GCA compliance.

03 To apply a trusted method for charge-backs on supplier shortages.

ras | SUPPLY CHAIN INTEGRITY

THE GFR PROVISION

- Unit, case, sell by date and compliance audit; validated supplier performance including overages and shorts.

- A rolling 13-week % error-rate overview.

- Every supplier on-boarded to be sampled in a 13-week cycle at the agreed sample size.

- Assurance of an industry recognised programme.

- Creates an onset for a cost-neutral balance, meaning efficiencies gained and savings made, **outweigh and cover the cost and charge-back of service.**

A RAS GFR in-bound process provides significant benefits:

Faster payments @ 100% of invoice.

Reduces supplier and retailer administration burden.

Minimises invoice matching and supplier conflict issues.

Greater use of your resource elsewhere.

Validated accuracy measure of stock.

Management information though a clear and concise dashboard for retailer, supplier, warehouse and 3PL.

Secure, efficient and accurate supply chain management; delivered.
